

Personal, Social and Emotional Development

We will continue our work on friendships and we will be learning how to resolve conflicts when they arise. We will be growing and learning how to become more independent and confident and we will be asking for help when we need it.

Physical Development

We will continue to develop our gross and fine motor skills so that we can form letters neatly for writing. We will be learning to play some basic ball games and developing our ball skills in PE lessons.

Communication and Language

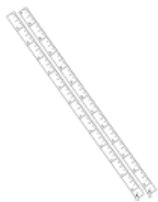

Our learning will continue and our vocabulary will grow with lots of new topic words. We will be working on expressing our thoughts clearly to a whole class group and we will be able to continue conversations adding appropriate detail. We will also be listening and taking turns in conversations.

Mathematics

Our maths work will continue to focus on addition and subtraction, saying one more/one less than numbers to 20 and beyond. We will be applying our knowledge to problem solving activities.

We will explore units of measure and we will think about how large dinosaurs really were and we will draw and measure these on the playground.

Literacy

We will read lots of non fiction books and use these to learn all about different types of dinosaurs. We will also read stories about dinosaurs and learn poems and rhymes to help us learn dino facts.

We will continue to work on our phonics and use our knowledge to write simple sentences remembering capital letters and full stops.

Expressive Arts and Design

We will be junk modelling!

We will plan and design our own dinosaurs to make out of junk! We will have to draw and label our designs and then make our dinosaurs from different junk materials, learning how to attach the pieces. Then we will decorate them and role play them as characters' in stories.

Start collecting your junk for us!

Understanding the World

We will be learning all about dinosaurs and the time that they lived on the Earth. We will learn about the differing theories as to how they became extinct. We will explore volcanoes and will make our own mini volcanoes in class. Different types of dinosaurs will be explored and we will learn about carnivores and herbivores.
